

## **EXTRACURRICULAR ACTIVITIES STATEMENT**

If you have other extracurricular activities (i.e. varsity sport, club sport, etc.) you must provide a written plan of when you intend on doing your four clinical rotations within 48 hours of your interview. It is imperative that you understand that time consuming extracurricular activities **CAN NOT** be undertaken during a semester in which one of the four clinical rotations is completed. If coursework is complete a student would be allowed to do 2 clinical rotations in one semester on only one occasion. All clinical rotations must be done during the Fall and Spring semesters. Inability to complete four clinical rotations during the four semesters of coursework may preclude your admittance into the program. Each case will be handled on a case by case basis.
