

So you want to teach in New Jersey?

To complete requirements for standard certification:

1. Read the [Online Application guide](#) and then [apply online](#).
2. Fill out the [Verification of Program Completion form](#), have it signed by Yuhang Rong, Certification Officer for Neag, and send to the Office of Licensing and Credentials (address on form).
3. Official UCONN transcripts.
4. A copy, including any translation key, of a valid Connecticut teaching certificate.
5. PRAXIS II Tests: Some [New Jersey Praxis II tests](#) are different than what CT requires. Check ETS website for required tests.
6. Physiology and Hygiene: Applicants applying for instructional certification must pass an examination in physiology and hygiene, including the effects of narcotics and alcohol. The examination is administered at the county offices of education. In lieu of this examination, the applicant may present basic military training or college level study in areas such as biology, health or nutrition.

These requirements may change. Always verify requirements with the appropriate state office.
